

12 % of water used in the home is in the shower. Take showers. Showering uses only 1/3 of the amount of water as opposed to bathing. TIP: Take 5 minute showers instead of 10 minute showers. Saves an average of 12 gallon.

15% of water used in the home is for laundry. A family of four can average 4 loads of laundry a week. That is about 175 gallons a week! TIP: wash full loads which should average 15-45 gallons.

50% of water we use outdoors is wasted from inefficient watering methods and systems. Turn off the water hose, sprinklers, even when it rains. Use a timer to remind you to turn of your water after your allotted time.

30% of water is flushed down the toilet! Ten toilet flushes in a day, uses about 40 gallons of water a day, for a family of four. TIP: be aware of other ways, around the house you can reduce water, to compensate.

14% of water is used in the kitchen. 5 gallons per minute with water running! TIP: wash produce in bowls, keep a jug of water in the fridge.

.5% of 1% of water is used for drinking. This is one area you should not cut back on. A few glasses a day is excellent for your health and hydration

Check for broken sprinklers, sinks, toilets and leaks!

**Savings:
250 gallons
per week.**
